EcoCatch Wasp

Rentokil
The Experts in Pest Control

The first line of defence against wasps.

Wasps can have a negative impact on your business operations, and can be an unwanted distraction for customers and colleagues. They can also be a Health and Safety issue for your business due to the risk of potential stings.

Having an effective wasp control solution is vital in order to help protect your business from damage caused by wasps.

If left untreated a wasp infestation on your premises can:

Potentially damage your property due to the construction of nests

Contaminate food produce and stock

Negatively impact your business reputation

Can cause a Health and Safety issue due to wasp stings

Sustainable Exterior Wasp Control

Rentokil EcoCatch Wasp is a non-toxic and effective way of controlling wasps in outdoor locations. The unit is 26% more effective at catching wasps than a traditional wasp pot.*

Once wasps are trapped in the unit, they are hidden from view in an appealing container, providing an unobtrusive and professional solution for your premises.

Highly Effective Wasp Control, Completed Safely and Sustainably

- **Sustainable Solution**
 - the unit is made of 30% recycled materials and is reusable, reducing waste
- **Flexible Installation**
 - doesn't require electricity and can be wall mounted, pole mounted or hung
- **Unique and Effective Design**
 - traps wasps in an inner container, hiding them from public view
- **High Level Attractant**
 - attracts wasps into the unit, reducing the number that could cause a nuisance to customers

*EcoCatch wasp had up to 26% better wasp catch rate in field trials when compared to that recorded in a common commercially available wasp dome trap.
