

# **DUAL** **AUTOGATE** **CONNECT**

Rentokil's new Dual AutoGate Connect device, with a barrier between the entry and bait sections, provides remote pest monitoring and protection against rats and mice.

**Rentokil**  
The Experts in Pest Control

**Dual AutoGate Connect** forms part of Rentokil's award winning PestConnect system, which also comprises of RADAR Connect and Rat Riddance Connect, which bring a new level of value and protection to customers.

Targeting rats and mice, Dual AutoGate Connect is a solution enabled by advanced technology to protect your business from pest risk, providing you with early detection.

Complying with local legislation, the solution is configurable to open the barrier only when infestation is established - ensuring a safe methodology to rodent infestation control.

In the event of pest activity on your premises, Rentokil technicians will promptly remove rodents from the units, inspect the area to determine points of entry, check the display and recommend preventative measures for enhanced protection.

Dual AutoGate Connect offers innovative technology to monitor both rats and mice, with the benefits including:

**Multi Rodent Detection**

Dual AutoGate connect has two sets of sensors which can be set to monitor only rats or both rats and mice

**Safe to Use**

Bait is kept in a separate, secure compartment with no access unless an infestation is proven

**Reduced Risk of Bait Exposure**

Controlled baiting methodology in line with local legislation
