

## Vehicle Disinfection Case Study

### Customer Background

McMahon and Nagle have been in the window business for over 40 years. They are Dublin's most established and prestigious suppliers of PVC Windows, Composite and PVC Doors, Sliding Sash Windows, and Patio and French Doors.

### Customer Challenge

Because McMahon and Nagle supplies products for homes and businesses, their vehicles are frequently on the road. As a result, they were at risk of coming into contact with viral pathogens. They wanted to protect their staff as well as their customers, so they decided that vehicle disinfection is the best way to accomplish this.

### How Rentokil Helped McMahon and Nagle

Our experienced technicians applied the appropriate PPE and RPE before using ULV disinfection fogging to disinfect the vehicle. This allows for large areas to be treated quickly and efficiently, as the extremely small droplets of the disinfectant fog settle underneath, on top of and on the sides of many objects and inaccessible areas.

That also included internal touch point cleaning, which can include the cleaning of Inside the car, start cleaning and sanitizing the essential touch-points like an interior door handle, steering wheel, ac knob, centre console, seat adjuster, mirrors, glove-box. Any surface which customer regularly come in contact with, using a high-level disinfectant.

### Vehicle Disinfection Service

Our qualified technicians are equipped with the necessary personal protective equipment, respiratory protective equipment and specialist disinfection equipment to work safely and effectively.

Our vehicle disinfection service is professional and legally compliant. Treatment can provide residual protection and biosecurity reassurance between cleans.
